PROFESSIONAL SUMMARY

I am a Frontend & Software Developer with over 4 years of experience in building scalable web applications using React, TypeScript, and modern UI architectures. My expertise lies in developing enterprise SaaS platforms, particularly in KYC systems, as well as performance optimization and cloud deployment. I'm also well-versed in WordPress custom development and actively enhancing my skills in AWS Solutions Architect

SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Tailwind CSS, Material UI

State Management: Context API, Redux

Backend: Node.js, Express.js

Databases: MongoDB, MySQL

DevOps & Cloud: AWS (EC2, Lightsail), DigitalOcean, Nginx, PM2, VPS (Ubuntu, SSH), Cron Jobs

CMS: WordPress, ACF Pro, Contact Form &

Tools: Git, Bitbucket, Vite, Vercel, Electron.js

PROFESSIONAL EXPERIENCE

Azlogics Private Limited June 2022 – Present

React Frontend Developer

Jun 2022 – Present Nagpur Maharashtra

- Developed and deployed KYC Platform v2 using React, TypeScript, and Vite, improving scalability and performance
- Implemented global state management (Context API) for complex multi-step workflows
- Built reusable component library using Tailwind CSS and Material UI
- Integrated AI-based document verification APIs, reducing manual processing
- Optimized frontend performance for real-time API handling and high concurrency systems
-

WordPress & Frontend Developer

Jun 2022 – Present Nagpur Maharashtra

- Developed KYC Platform v1 with onboarding and verification workflows
- Built custom WordPress themes using ACF, including dynamic layouts and relationships
- Implemented Headless CMS architecture using WordPress REST APIs and React
- Managed deployment pipelines via cPanel and optimized MySQL database performance

PROJECT

KYCPlus v2.0 – Identity Verification Platform

- Designed scalable **multi-entity KYC engine** (Individual, Minor, Non-Individual)
 - Implemented **OCR-based data extraction and validation system**
 - Developed **automated PDF generation** for compliance reporting
-

KYCPlus v1.0 – KYC System

- Built full UI and dashboard using React
 - Developed **multi-step onboarding workflows** with PAN/Aadhaar verification
 - Implemented **document generation and download system**
-

RPACPC Utility (v1.0 & v2.0) – Performance Optimization Tool

- Migrated UI from Material UI to Tailwind CSS, improving performance and responsiveness
- Built **bulk data processing UI** for high-volume operations
- Implemented **automated backup system using Cron Jobs and Rclone**

Custom WordPress Website Development

- Developed **custom WordPress websites** using ACF Pro and flexible content fields for dynamic, client-specific layouts
- Built **fully responsive, SEO-friendly themes** with optimized performance and fast load times
- Implemented **custom post types, taxonomies, and relational data structures** for scalable content management
- Integrated **REST APIs for headless CMS architecture** with React-based frontends
- Optimized website performance using caching, database tuning, and lightweight frontend architecture

EDUCATION

Bachelor of Computer Applications (BCA) – Pursuing
